

Project Design Phase

Problem – Solution Fit

Date	14-07-2026
Project Name	Customer Registry

Problem–Solution Fit:

Problem–Solution Fit refers to identifying a real problem faced by users and providing a solution that effectively addresses their needs. In the Customer Complaint Management System, customers often face difficulties in registering, tracking, and resolving complaints efficiently. The proposed solution provides a centralized platform where customers can submit complaints, administrators can assign them to agents, and agents can resolve them in a structured manner. This improves transparency, communication, and customer satisfaction.

Purpose:

- To provide a centralized platform for managing customer complaints.
- To reduce the time required for complaint registration and resolution.
- To improve communication between customers, administrators, and support agents.
- To provide real-time complaint tracking and status updates.
- To increase customer satisfaction through efficient complaint handling.
- To eliminate manual complaint management processes and improve operational efficiency.

Problem – Solution Fit Template:

Market & Customer	 1. CUSTOMER SEGMENT CS • Customers who want to register complaints and track their resolution status. • Administrators who manage complaints and assign them to agents. • Support Agents who resolve customer complaints.	 3. CUSTOMER CONSTRAINTS CC • Lack of transparency in complaint resolution. • Manual processes consume more time. • Difficulty in monitoring complaint progress.	 4. AVAILABLE SOLUTIONS AS • Traditional complaint registers. • Email-based complaint handling. • Spreadsheet tracking systems. • Phone-based complaint systems.	Solution & Alternatives
	 2. JOBS TO BE DONE / PROBLEMS JBP • Customers face difficulty tracking complaints manually. • Complaint assignments are not organized. • Status updates are delayed and unclear.	 5. PROBLEM ROOT CAUSE RC • No centralized platform for complaint management. • Manual assignment and tracking processes. • Poor communication between customers and support teams.	 6. BEHAVIOUR BE • Customers frequently contact support for status updates. • Admins spend time manually assigning complaints. • Agents lack a structured workflow for resolving complaints.	
Problems & Behaviors	 7. TRIGGERS TR • Customer faces an issue with a product or service. • Need for quick complaint resolution. • Requirement for real-time status tracking.	 9. YOUR SOLUTION SL A MERN Stack based Customer Complaint Management System that allows customers to submit complaints, admins to manage and assign complaints, and agents to update and resolve complaints efficiently.	 10. CHANNELS OF BEHAVIOUR CH • Web Application • Email Communication • Online Customer Support Portal	Behavior & Root Causes
	 8. EMOTIONS: BEFORE / AFTER EM Before: Frustration, confusion, delayed support. After: Satisfaction, transparency, faster resolution.		 11. OUTCOME OC • Reduced complaint resolution time. • Improved customer satisfaction. • Better complaint tracking and management.
