

Project Design Phase

Proposed Solution

Date	14-07-2026
Project Name	Customer Registry

S.No	Parameter	Description
1	Problem Statement (Problem to be solved)	Customers face difficulties in registering, tracking, and resolving complaints through manual processes. There is a lack of transparency, delayed responses, and inefficient complaint management.
2	Idea / Solution Description	Develop a MERN Stack based Customer Complaint Management System where customers can submit complaints, admins can manage and assign complaints, and agents can update and resolve complaints efficiently.
3	Novelty Uniqueness	/ Provides a centralized platform with role-based access for Customers, Admins, and Agents. Enables real-time complaint tracking and status updates.
4	Social Impact Customer Satisfaction	/ Improves customer experience by providing faster complaint resolution, better communication, transparency, and efficient support services.
5	Business Model (Revenue Model)	Can be offered as a Software-as-a-Service (SaaS) solution to organizations and businesses for managing customer support and complaint handling operations.
6	Scalability of the Solution	The system can be scaled by adding more users, agents, and complaint categories. Cloud deployment and database scaling can support increased workload and future enhancements.
