

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Functional Requirements Table :

Following are the functional requirements of the proposed solution:

FR.No	Functional Requirements	Sub Requirements
FR-1	User Authentication	Customer Registration Customer Login, Role Based Access (Admin, Agent, Customer)
FR-2	Complaint Management	Create Complaint, View Complaint Edit Complaint, Delete Complaint
FR-3	Complaint Assignment	Assign Complaint to Agent View Assigned Complaints Manage Complaint Workflow
FR-4	Complaint Resolution	Update Complaint Status Mark Complaint as Resolved Track Complaint Progress
FR-5	User Management	View Users Update User Details Delete Users

Non Functional Requirements :

NFR. No	NonFunctional Requirements	Description
Nfr-1	Usability	Easy to use interface with simple navigation for customers, agents and administrators.
Nfr-2	Security	JWT Authentication, Password Encryption using bcryptjs and Role Based Access Control.
Nfr-3	Reliability	System should reliably store and retrieve complaint information without data loss.
Nfr-4	Performance	System should process user requests and database operations efficiently.
Nfr-5	Availability	Application should be available whenever users need to access complaint services.
Nfr-6	Scalability	System should support increasing numbers of users and complaints without major performance degradation.
